Doc. No: H020115A

Subject: Directory Structure for EED File Server

The file structure for the EED File Server is shown below. The following conditions apply:

1. PPD system administrator has (Full Control) permission over "\eeds.ppd" directory & sub-directories.
2. EED Admin Assistant (jody@fnal.gov) has (Full Control) permission over "\admin" directory & sub-directories.
3. EED Group Leaders (demaat@fnal.gov, hance@fnal.gov, larwill@fnal.gov, yarema@fnal.gov) have (Full Control) permission over "\internet\www\eedoffice" and "\internet\www\eedoffice-w" directories & sub-directories.
4. EED Group Leaders (same as listed above) have (Full Control) permission over "\projects" directory & sub-directories.
5. Users (e.g. hance\$) have (Full Control) permission over their own directories (e.g. \ppdsrver\hance\$).
6. All members of the "Ppd\_Users" group will have read & execute (RX) permission on all \userx\$ directories and newly created sub-directories and documents as a default. Note that each directory owner can change his own permissions.
7. The www (web anonymous account) will have default read access permission to each \userx\$ directory and \userx\$\myweb subdirectory. Directory listing is TURNED OFF to the www in these directories. Access is to specific URL only (eg <http://www-ppd.fnal.gov/hance.myweb/index.htm>)
8. Group Leaders can also publish documents to the web by placing them in or below the "\internet\eedoffice" and "\internet\eedoffice-w" directories. "\internet\eedoffice-w" is visible to anyone in the world with internet access. However, "\internet\eedoffice" is available only **WITHIN FERMILAB**. Directory listing is TURNED OFF in these www directories. Access is to specific URL only (eg <http://www-ppd.fnal.gov/eedoffice-w/index.html>).

\*(RX) = Read, & Execute
